OUR CONVICTION

One company.
One shared reality.

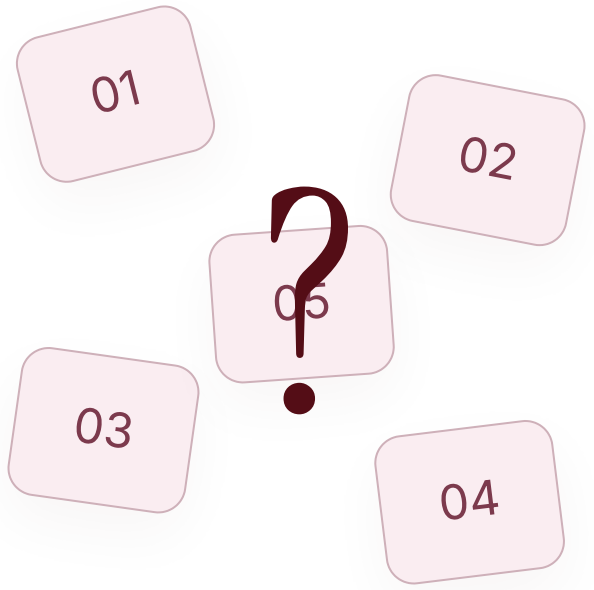

People and AI acting with the same context.

THE SHARED ENEMY

The work between the work.

Search. Copy. Chase. Reconcile.

THE MOMENT THAT STAYS

Change once.
Stay in context everywhere.

One customer deadline. Three views. The same context.

Guided preview · Sample data

"Could we get the offer on Friday? Our team is making the decision earlier."

Before approval	After your approval
Customer context	Customer context
Monday	**Friday**
Prepare the offer for Nordwind	Prepare the offer for Nordwind
Monday	**Friday**
Offer draft	Offer draft
Monday	**Friday**

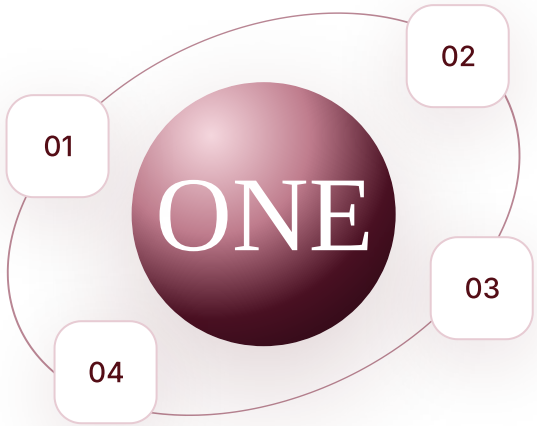

People decide. Context stays connected. Customer context, task and offer draft now show Friday. Nothing was sent.

This interactive product thesis follows the Peak One Home design. The sequence is staged with sample data and performs no actions in the live product.

THE PRODUCT THESIS

Many perspectives. One business reality.

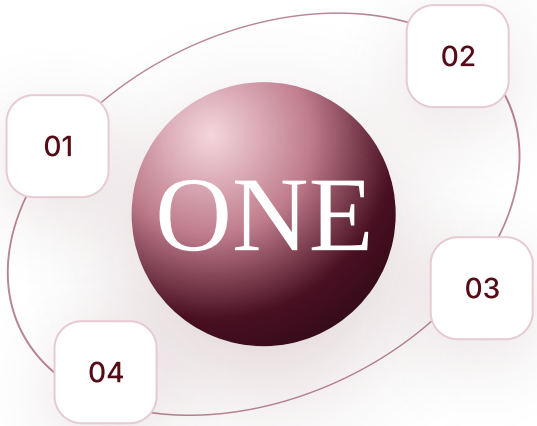

Customer → Task → Decision → Outcome

HOW THIS BECOMES A BUSINESS

Start with value. Grow with use.

Entry → Recurring use → Expansion

THE LONG-TERM SCALE

€100bn needs a model.

Regions × paying customers × annual revenue per customer

Examine the market model

Illustrative 10× scenario · not a forecast

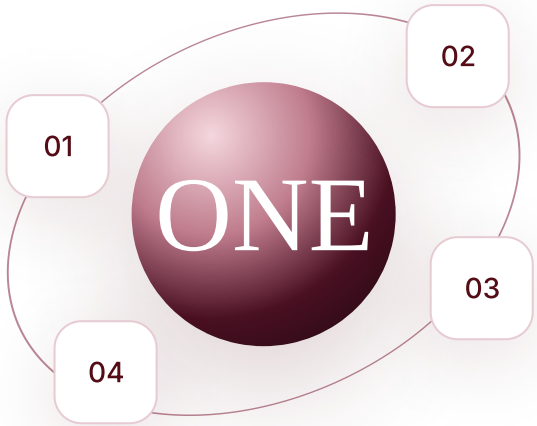

Paying accounts, approx.	Annual revenue per account	Required annual revenue
4.2M	€2,395	10B €

Customer count and the 10× blended revenue multiple are assumptions, not a forecast or proven market potential. Premium plans include services: this is not a blanket SaaS multiple. Enterprise value is not equity value or investor return.

WHAT SHOULD COMPOUND

More connected context. More lasting value.

Workflow integration · Retention · Repeatable distribution

CONVICTION YOU CAN EXAMINE

Thesis. Demo. Next proof.

Understand it today. Challenge it in the deep-dive.
